

Washette BB-50 Natural Water Bidet

Think about it!

You don't clean a dirty car by wiping it with a dry cloth, or clean your dishes with a towel, or clean your hands by wiping them on a dry towel - you wash them ... with water, of course!

What could be more natural ... than cleaning with water?

No matter what toilet paper you use, it is not sufficient to properly clean your behind. You can sterilise it, bleach it, perfume it, moisten it, but in the end you are still just smearing 'you-know-what' over your skin.

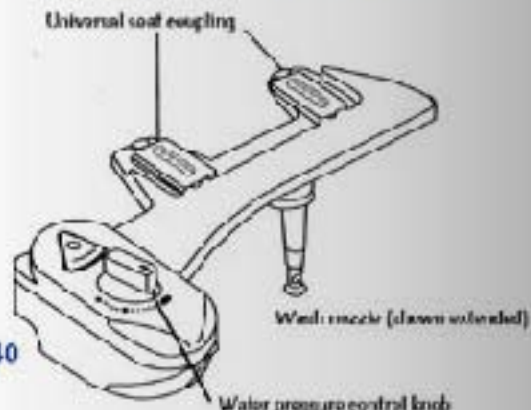

As a personal hygiene system a bidet is not just a luxury, it is one of the most beneficial additions you can make to your daily routine. Besides offering shower freshness for both men and women, every time you visit the bathroom, a bidet provides optimum hygiene, alleviates many medical conditions and ailments, helps with cleaning for the elderly, the very young and generally contributes to good health for the whole family.

Why wipe? ... Wash!

Unlike toilet paper, bidets are plumbing and septic friendly as well as caring for the environment. A bidet is not an indulgence but regular use is one of the most practical things you can do for yourself and your family.

Washette BB-50 FEATURES:

- The BB-50 is our most basic model, it is also our most popular model
- Uses cool natural water for hygienic wash
- No electricity or batteries needed
